

## 130 Years of Fiocchi

1876	Year of foundation
1877	Start of ammunition production
1901	Product diversification: snaps
1930	Beginning of export
1940	Development of social policy in the territory of Lecco
1945	Bombing of the plant in Lecco
1946	Re-building of the plant
1970	Expansion of European markets
1980	Start of .22 Super Match production
1983	Fiocchi USA established
1985	New quality inspection unit
1985	Development of new "leadless" primers
1989	Nato qualification of the 9mm. Parabellum cartridge
1990	Impulse toward world-market expansion
1990	Quality System Certificate in accordance with the standards NATO AQAP-1
1991	Introduction of frangible bullet ammunition production
1993	New loading department of .22 cartridges
1994	New "flexible" centerfire ammunition manufacturing line
1994	New Robotic line for shot shell case manufacturing
1995	Introduction of the "Official" clay target line
1996	New line of Spas Mil and Law Enforcement ammunition
1999	New line of hunting cartridges
1999	Nato qualification of the cartridge 5.56mm Ball
2003	Environment Management System Certificate in accordance with the standards ISO 14001:1996
2003	Quality Management System Certificate in accordance with the standards UNI EN ISO 9001:2000
2006	Fiocchi of America re-launches the sporting rifle line which was discontinued, aside from military production, in the 1950's

Fiocchi Munizioni was founded in 1876 by Giulio Fiocchi who took over a small black powder manufacturing facility.

At that time a radical change was being introduced in firearms: the newly developed breech-loader. This transition from traditional muzzle loaders sparked the modernization of ammunition and its components.

Fiocchi took a chance and began manufacturing shotshell cases with primers suitable for reloading. In the early 1890's the production was extended to the manufacture of primed cartridges loaded with both shot and bullets. During this time, Fiocchi Munizioni phased out the production of black powder as it was no longer profitable or in demand.

Since the very beginning, the Company adopted a structure that would be adequate for future success. All production machines and equipment have been designed and engineered to the exacting requirements of Fiocchi. Such a strategy has enabled Fiocchi to master the production of quality products while utilizing the most up to date technology available.

During these 130 years of existence, Fiocchi has produced a huge array of ammunition. We are proud to have a history of meeting the needs of the world marketplace; from ammunition for rifles, pistols or shotguns, with cartridges of many interesting configurations. Nowadays, Fiocchi is a world leader in small gauge ammunition and offers a wide range of products suitable to meet the demands of the most discriminating hunters and shooters.

## President's Message

Stefano Fiocchi, President Fiocchi: Italy (left)  
Pietro Fiocchi President Fiocchi: USA (right)

130 years...

If it wasn't that I am preparing to go hunting black grouse in the Italian alps, I would feel very old. I guess my ancestors have done a few things right if I am still here carrying on the tradition of making ammunition. I am proud of our tradition and history, but it's what we do today that will continue our legacy.

I have prepared a lot of new and exciting products for 2006 and I hope you will enjoy using them as much as I did developing and then testing them in the field, (yes, I get paid to go hunting... it's tough, but someone has to do it). Recently, I had the pleasure of bagging my first mountain goat using a prototype from an initial run of the Fiocchi 270 WIN with a nice SST bullet by Hornady; I was tired of using ammunition from my competitors, knowing that if we can make military ammo that can hit its mark at 1,200 yards we can obviously make great hunting or target rounds with the help of some quality bullets from US manufacturers like Sierra and Hornady.

Take a look at our new rifle offering. For our initial line-up we have opted to keep it to a "chosen few" items... reliable and precise. We will add more calibers and bullet configurations in the future, but for now we are dedicated to making these few in the right way.

What about all the new items we engineered for the avid pistol and revolver shooter? My humble opinion is that this ammo is solid, reliable and functionally pleasing; but, my opinion is biased, so I invite you to test the products and let me know.

The new packaging is looking great, but not only the box is new but also the ammo inside... new and better. We have listened to the consumers and have implemented as many of their suggestions as we could, keeping in mind that some submissions were down right impossible to attain, but we love the spirit of pushing the limits in Missouri.

Enough talk about ammunition... let's go out and use it! My bird dog urges me through his black moist eyes, saying "black grouses are waiting man! Drop the stupid computer and let's go..."

There's fresh snow on the mountain..." He is right, at the end of a long week of work, we have to go play; otherwise, why work?

Thank you for your continued support.

**Pietro Fiocchi**  
President, Fiocchi of America

## New Products for 2006

Fiocchi of America is making a quantum leap for 2006 by reintroducing, after 50 years, an expanded sporting centerfire line. The Extrema, Exacta, and Shooting Dynamics Lines present new controlled expansion hollowpoint bullets, long overdue additions of popular bullet configurations and a wider selection of calibers. When integrated with our existing products, we have created a more complete and user friendly offering!

# FIOCCHI

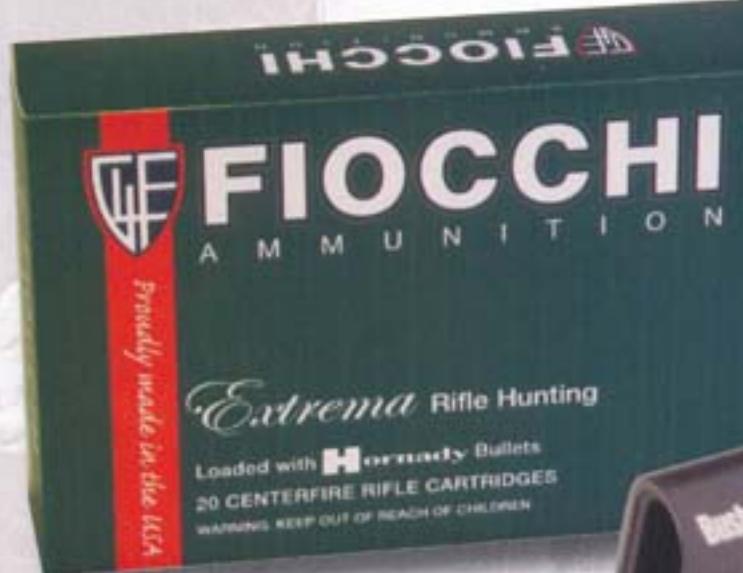

AMMUNITION

## EXTREMA RIFLE HUNTING

We have employed the best components for a superlative rifle line, matching Hornady SST™ and Sierra GameKing™ bullets with our new cases and dependable primers. We use only the best American powders loaded on state-of-the-art equipment in our Ozark, Missouri plant. The Extrema Hunting Line will soon be a favorite of sportsmen worldwide.

Match grade components with ultimate performance is the key to the Extrema Line.

See full-line and ballistics on pages 18 & 19.

## EXACTA RIFLE MATCH

Manufactured at our Ozark, Missouri plant, the Exacta Rifle Match merges with our Exacta Line for the demanding match shooter. Loaded with Sierra MatchKing™ bullets. Hand loaders will be challenged to equal our level of accuracy and performance.

## RIFLE SHOOTING DYNAMICS

We are sure that the Rifle Shooting Dynamics line will quickly become a hunter and shooter favorite. Loaded in the U.S.A. utilizing Hornady™ bullets, top quality American powders and selected components. Price AND quality for the high volume shooter, this is the aim of our Shooting Dynamics Line of products.

# FIOCCHI

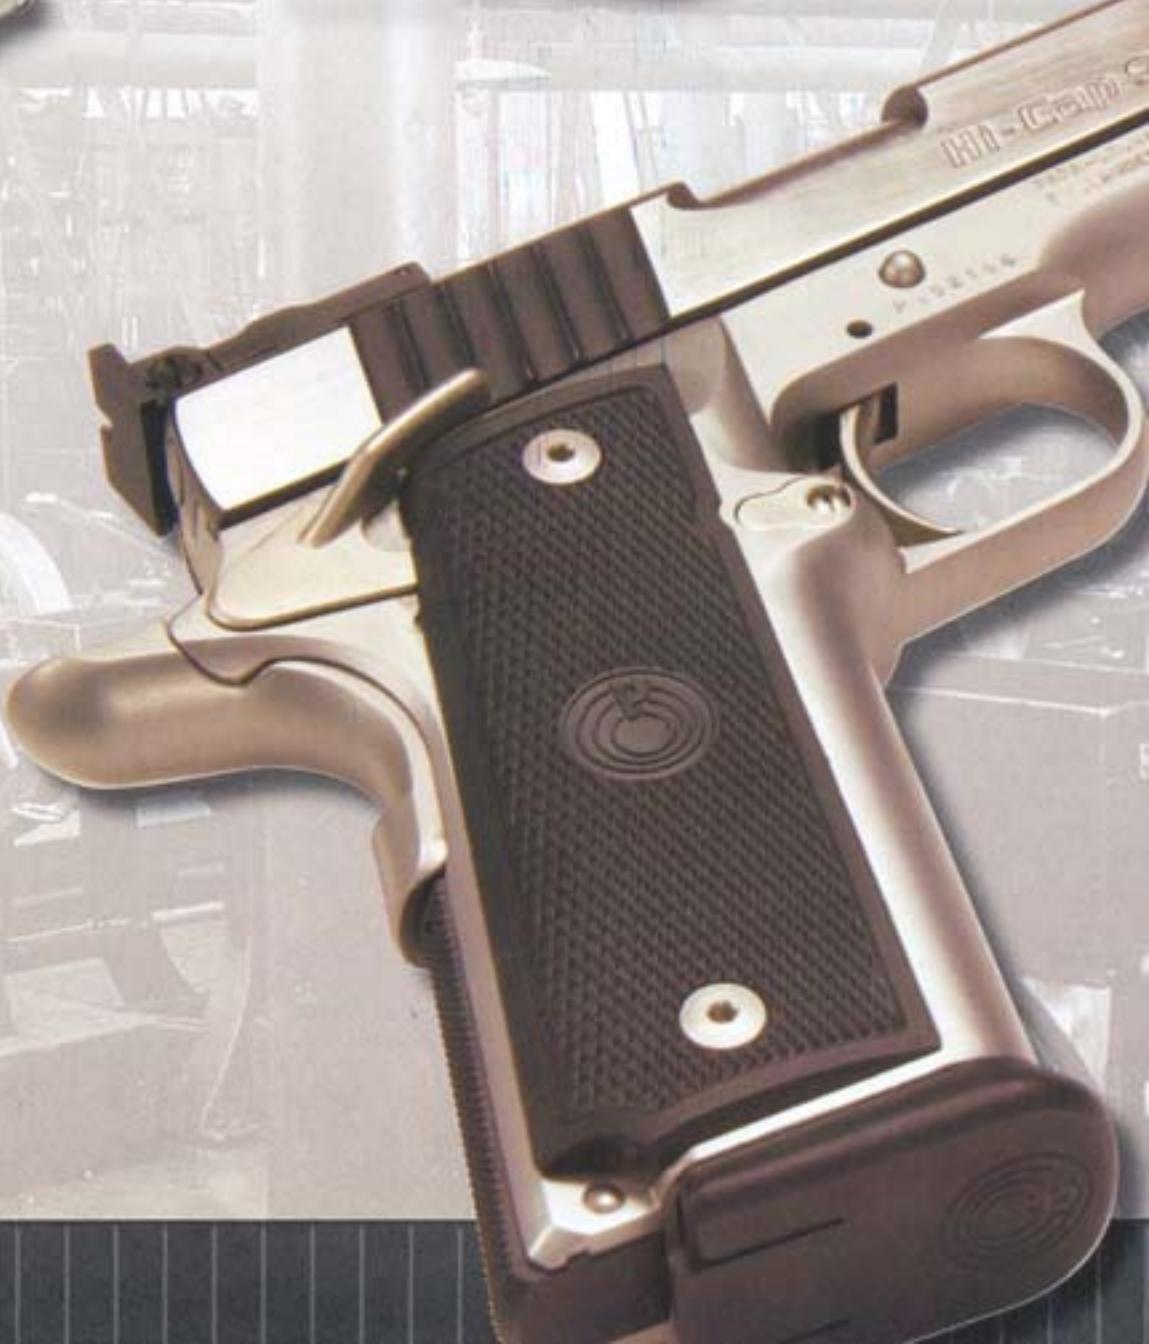

AMMUNITION

## EXTREMA PISTOL X.T.P. LINE

Loaded with XTP™ bullets from Hornady,™ (noted for their long-standing tradition for extreme bullet performance), we are proud to bring you this new line of handgun ammunition. We use controlled expansion bullets that pack some exceptional downrange performance and unmatched ballistics. We introduce the world renowned Fiocchi nickel-plated brass cases and classic centerfire primers for an Extreme shooting experience.

See full-line and ballistics on pages 20 & 21.

**130**  
Years of Excellence

## EXACTA PISTOL IPSC MATCH

In duplicating the customary European IPSC loads, we have engineered a victorious classic for the US market. Fiocchi USA utilizes the traditional Fiocchi Primed Brass with US powders and bullets, while adhering to unmatched standards in deviation and precision. Attention to consistency and reliability ensures this to be a proud addition to the Exacta Competition Line.

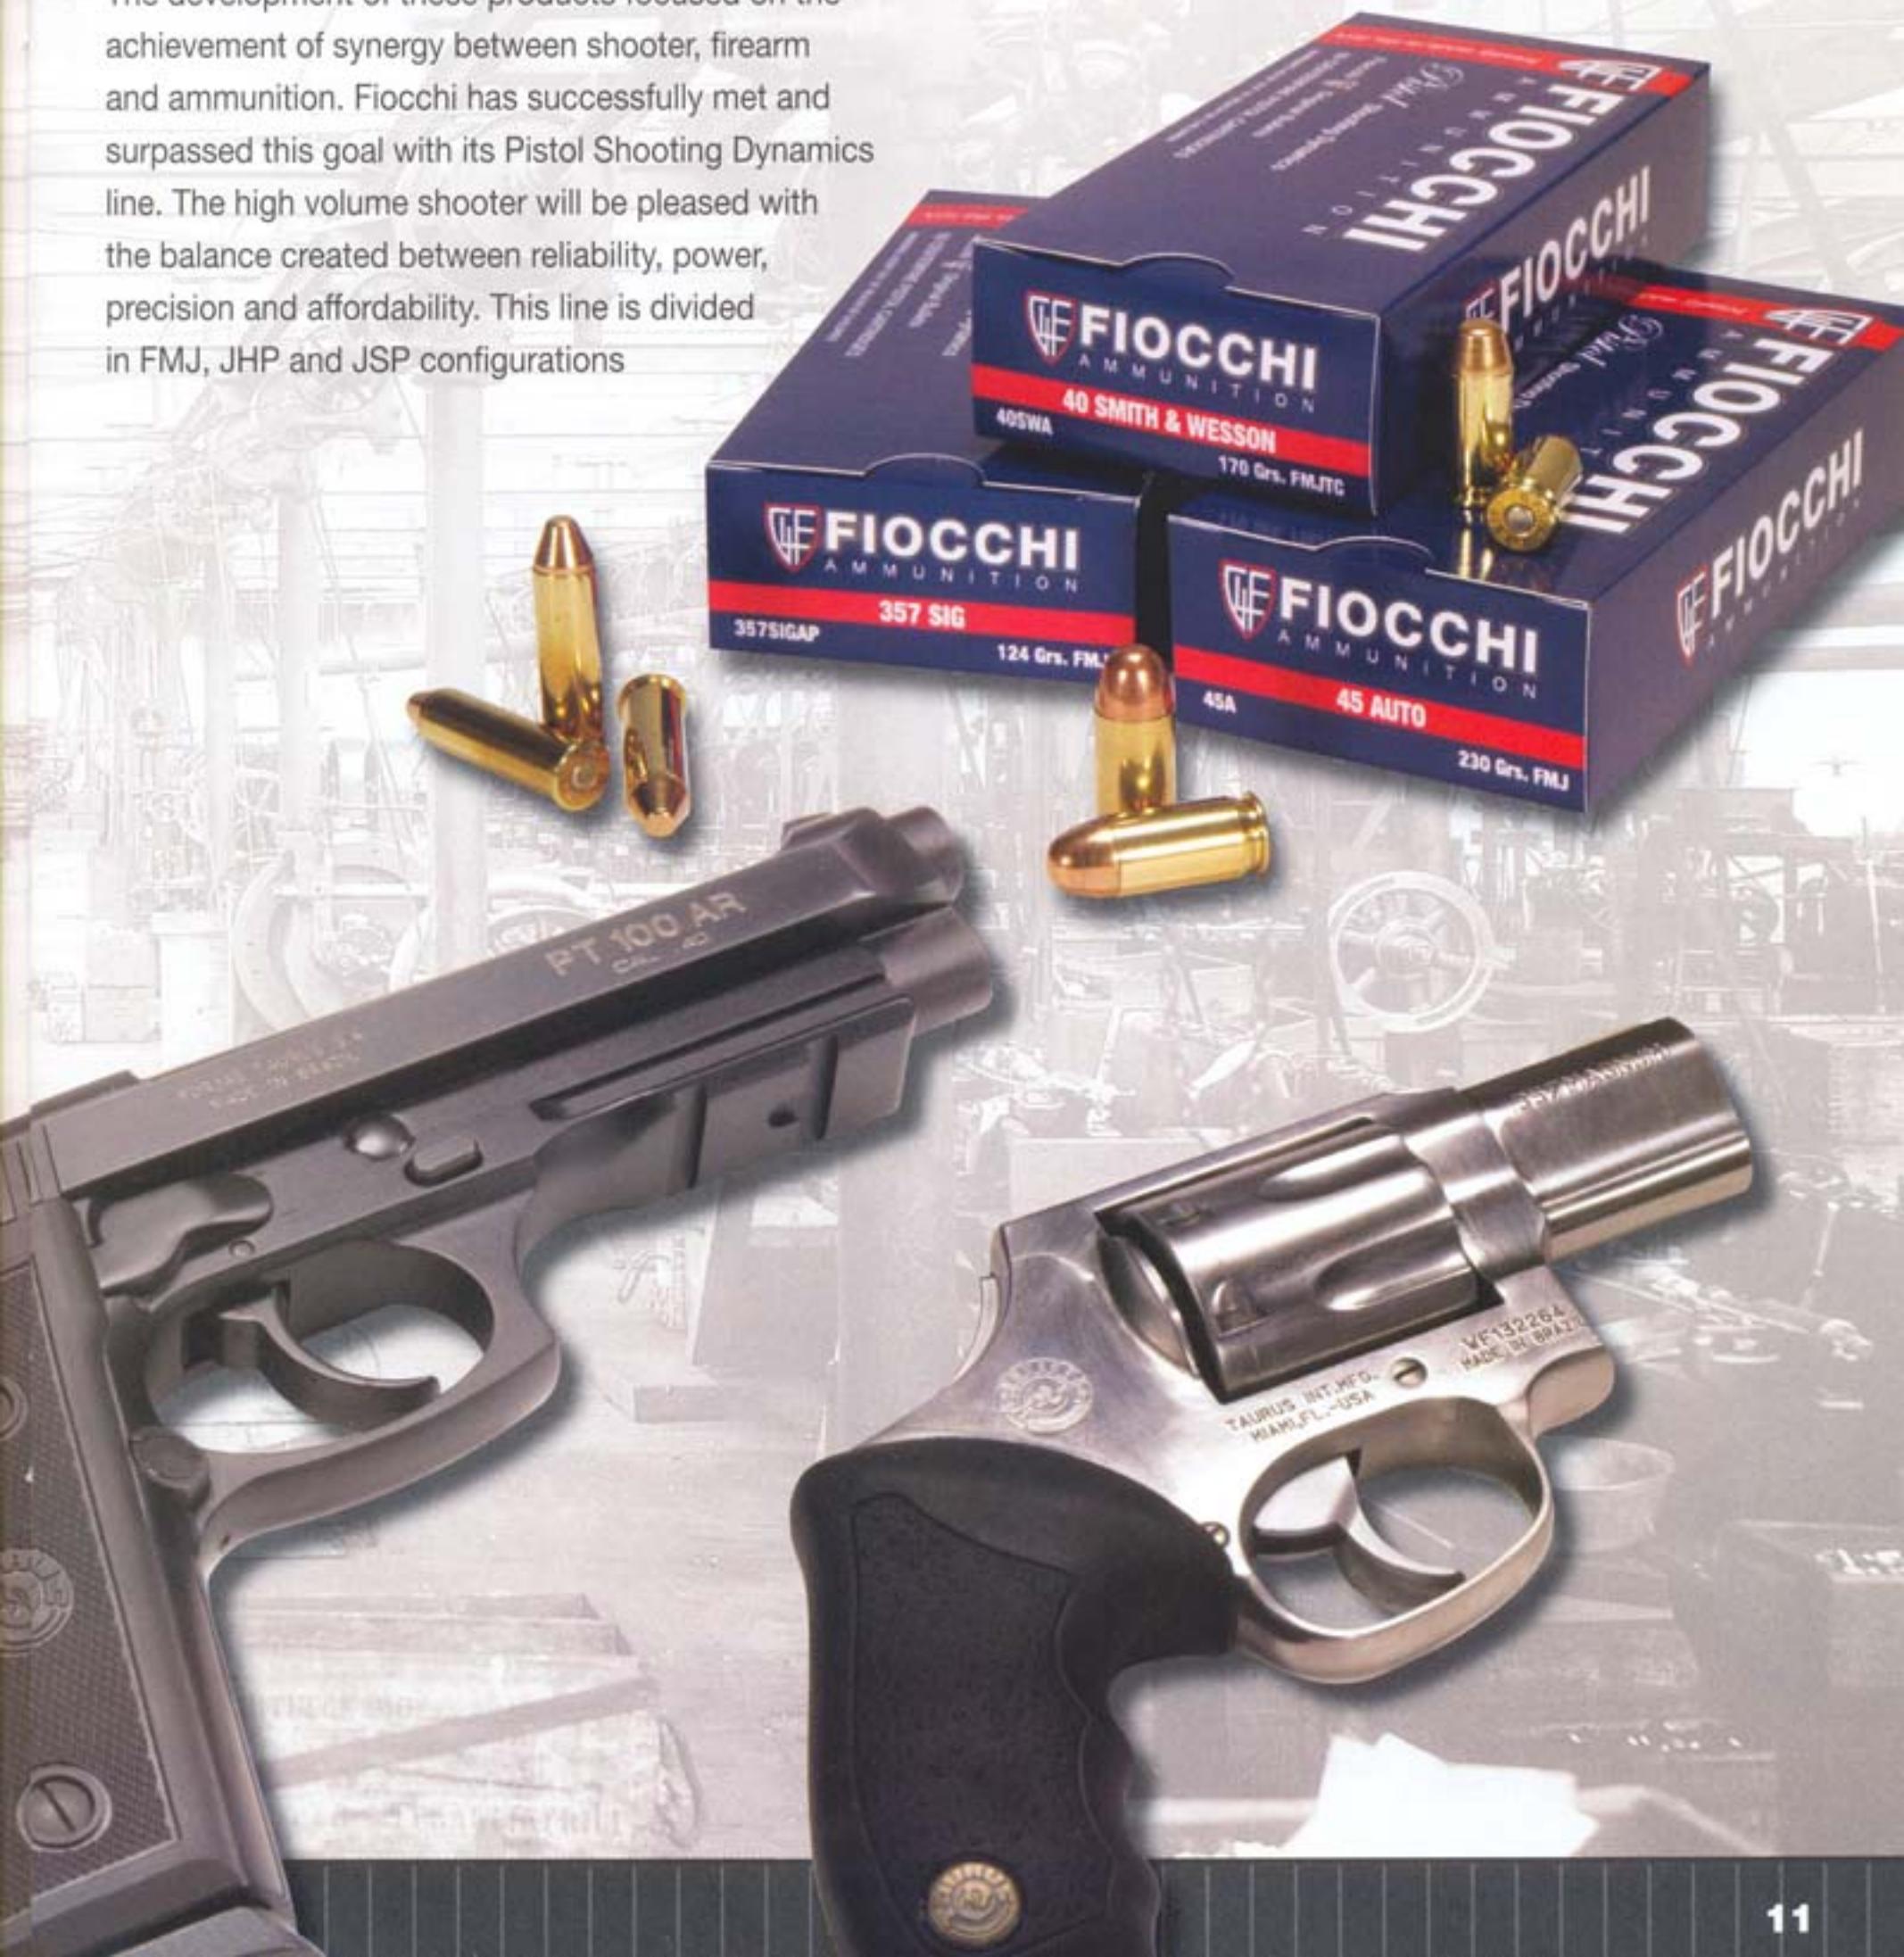

**FIOCCHI**  
AMMUNITION

## PISTOL SHOOTING DYNAMICS

The development of these products focused on the achievement of synergy between shooter, firearm and ammunition. Fiocchi has successfully met and surpassed this goal with its Pistol Shooting Dynamics line. The high volume shooter will be pleased with the balance created between reliability, power, precision and affordability. This line is divided in FMJ, JHP and JSP configurations

# FIOCCHI

AMMUNITION

## FIOCCHI PREMIUM TARGET SHOT SHELLS

The Fiocchi line of Premium Target Loads is designed specifically for competitive shooters.

The unmistakable "Purple" Target Load is the offspring of a 50-year tradition of supporting the world of trap, skeet and now sporting clays, FITASC and Compaq. Fiocchi USA follows the footsteps of our parent company in Italy whose experience awards them countless Olympic Gold Medals, World Titles and European Championships.

We have the best of two worlds in our Premium Target Load range: The Italian tradition of excelling in primed hulls and wads, and the American's unmatched reliability in shot and powders. Fiocchi Premium Target Loads... an explosive cocktail that will bring a winning smile to many competitors' lips

*See full chart range page 22 & 23.*

Years of Excellence

# FIOCCHI

AMMUNITION

## GOLDEN PHEASANT

The Golden Pheasant has quickly become a standard for the Midwest hunter. The perfect balance of consistent speeds and dense patterns are achieved by using premium powders and nickel-plated shot. Strict ballistic tolerances ensure the shot to shot consistency expected and appreciated by our customers.

## HIGH VELOCITY

High Velocity Loads are available in 12, 16, 20, 28 and 410 Gauge. The High Brass shotshell is the mainstay of the successful hunter, developed for performance on those though, demanding shots encountered by wing shooters all over the world. As with all our shells, constant ballistic attention is maintained for shot to shot consistency.

## GAME & TARGET

In the world of "Promotional" ammunition, we feel shooting sportsmen deserve an affordable price and a quality product. We use the same manufacturing standards for both our promotional loads and our premium loads. We sell our Promotional loads on value, not price alone.

## STEEL

From Speed Steel to Low Recoil Steel Target Loads, Fiocchi offers a complete line of what every outdoorsman needs. Whether you believe that "Speed Kills" or follow the "Payload is Everything" theory, Fiocchi has your load.

Our Steel Target Loads are available in both 12 and 20 gauge. At 1,200 fps, these loads are perfect for those venues that require or simply prefer using a non-toxic load on the range. Priced to be competitive where the volume of shooting is sometimes driven by the cost of shells.

## BUCKSHOT

The best available load, featuring nickel plated shot guaranteeing surface hardness, therefore outstanding pattern. Also in Low Recoil configuration.

## SLUGS

Available in both 12 (7/8 oz. and 1 oz.) and 20 (7/8 oz.) gauge, our Slug series features an Aero-Wad which stabilizes the slug for maximum downrange accuracy.

Ignited by the 616 Primer, the custom powder blend provides dependable and consistent performance of our slug.

## RIMFIRE

.22 Rimfire Super Match Line is manufactured in small lots. This line combines high quality performance with ballistic uniformity and is designed for the shooter demanding shot to shot dependability.

We added to our gold medal winning Super Match Exacta Line a fantastic new silhouette round, very fast and accurate.

New for 2006 a hunting line both in 22 L.R. and in the popular 22 Win. Mag.

## SPECIALTY BLANKS

Fiocchi blanks are very useful for reenactments, ceremonies, training exercises and hunting dog training. They will give you the noise and realism of conventional ammunition without the bullet. Our blank ammunition has been used by several movie and historical reenactment groups throughout the U.S. All Fiocchi blanks are manufactured using brass cases. Most rimmed calibers now incorporate crimped primers for more reliability in revolvers.

The ballistics data shown was determined by testing under controlled conditions. Actual performance may vary due to external factors - temperature, humidity, different lots of powder, priming mixture, type of barrel groove and length, etc.
